

Heading, displaying the selected game's teams and the current status of the game and the current quarter.

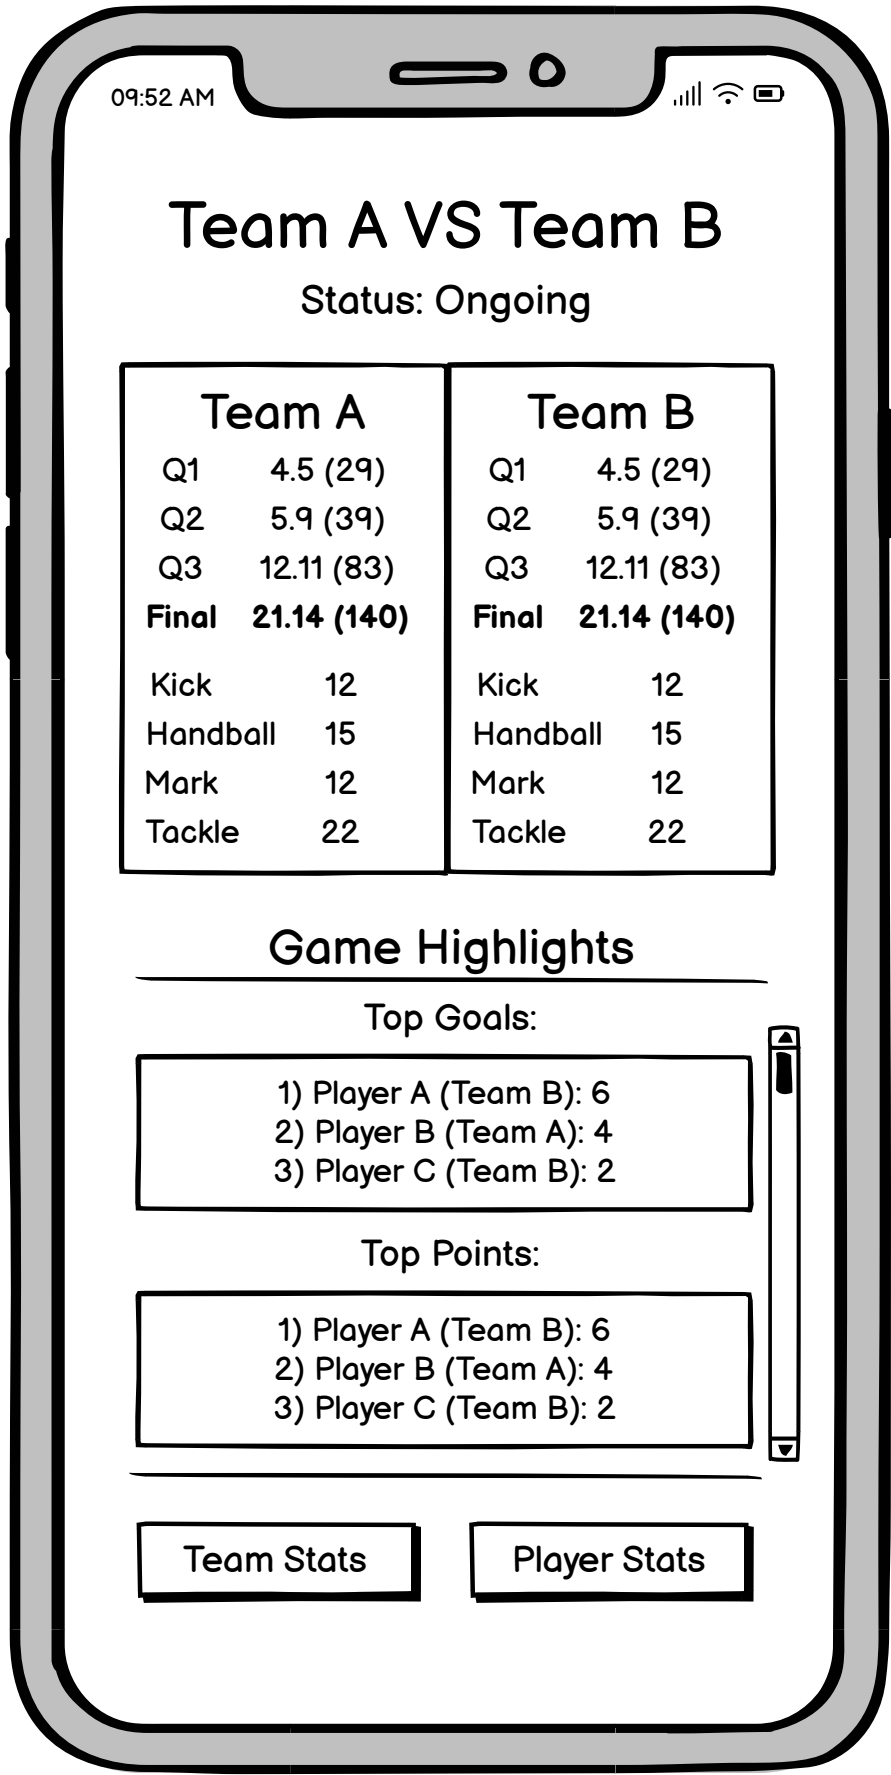

Score board that updates both team's stats live (as the actions are recorded).

Officials can record an action but selecting a team member for one of the teams via a drop down menu and then selecting the button for the relevant action. The 'goal' and 'point' buttons are separated (and maybe greyed out) to signify that a kick or handball action must be selected before a point/s is added.

Button to end the quarter or end the match and record statistics as relevant to a previous match.

When an action is recorded a notification box opens providing a confirmation for the user. Selecting the OK button returns the user to the previous screen.

Team Stats

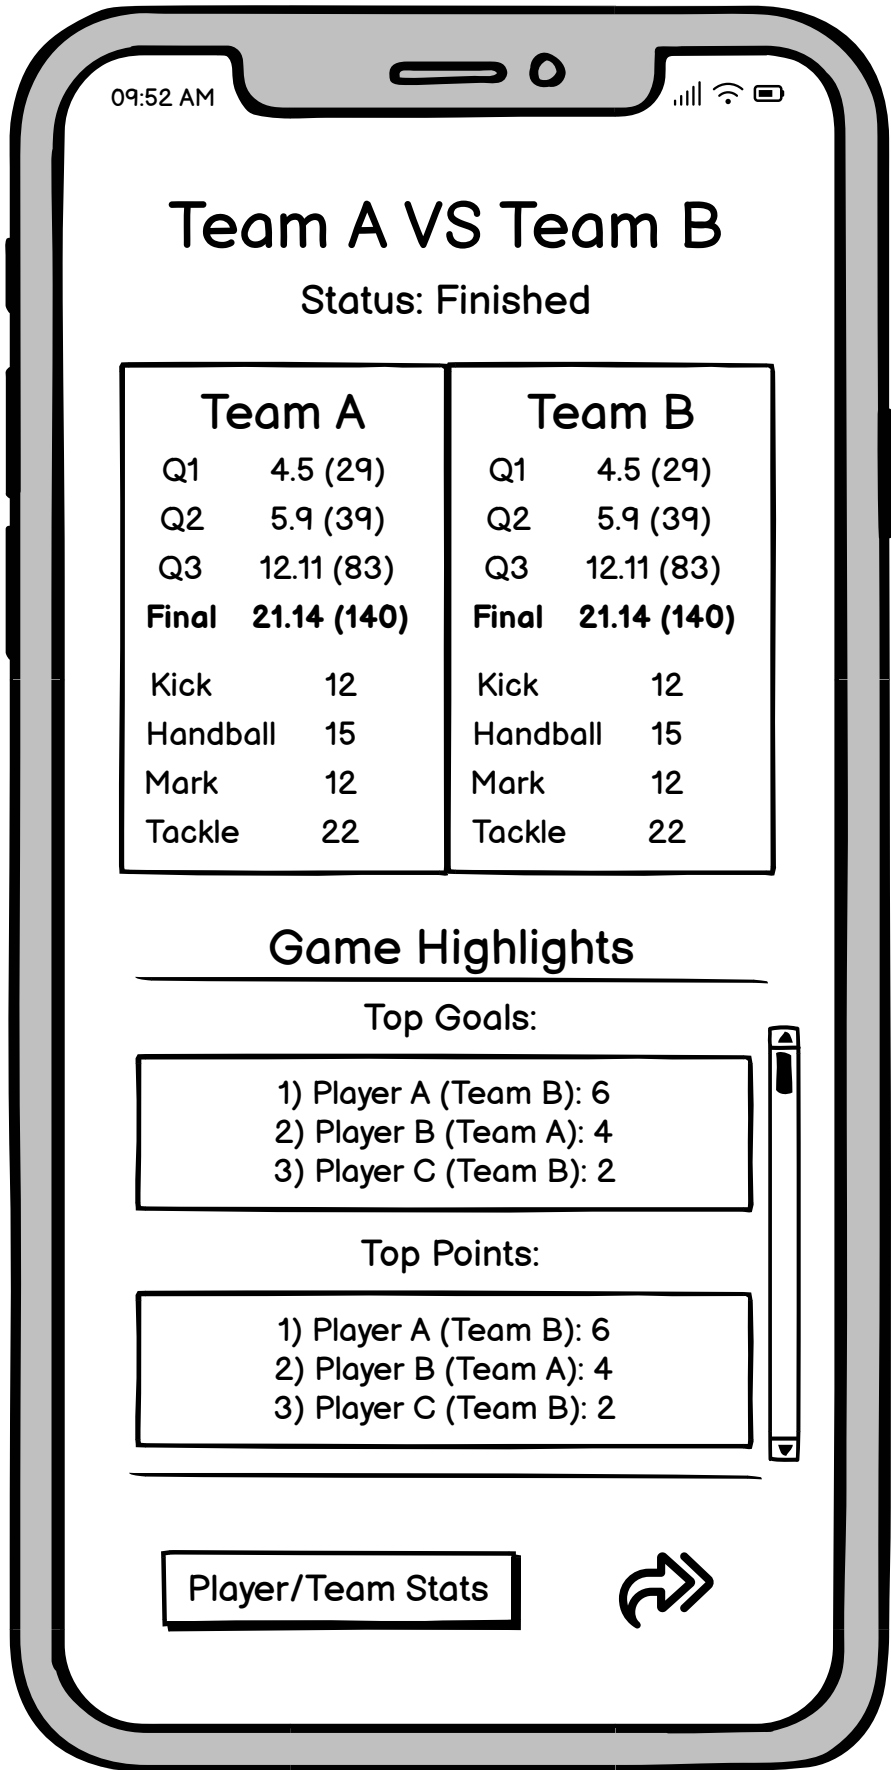

Player Stats

Heading, displaying the selected game's teams and the current status of the game.

Score board that updates both team's stats live (as the actions are recorded) including the quarterly score. When a quarter is finished its text will be highlighted in red.

Simple breakdown of the best players stats within the current match. The scroll bar indicates that more stats can be found by scrolling down the view.

Buttons link to player or team specific stats for the current game.

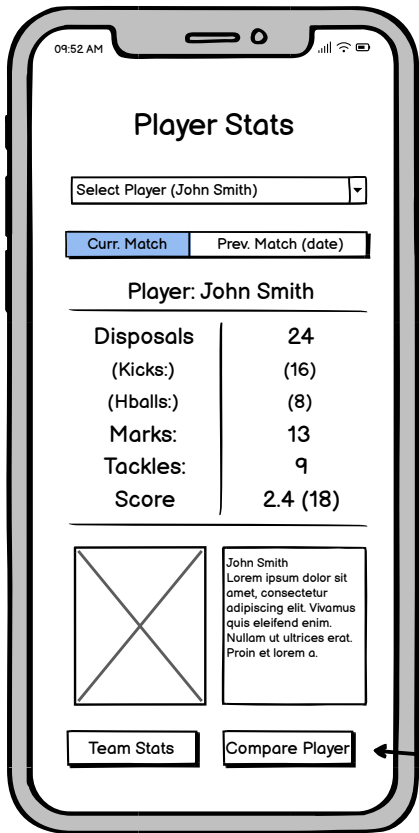

Heading, displaying the selected game's teams and the current status of the game.

Score board both team's stats including each teams quarterly score. The winning team's scoreboard would be highlighted in a different colour (maybe a darker background and white text).

Simple breakdown of the best players stats within the current match. The scroll bar indicates that more stats can be found by scrolling down the view.

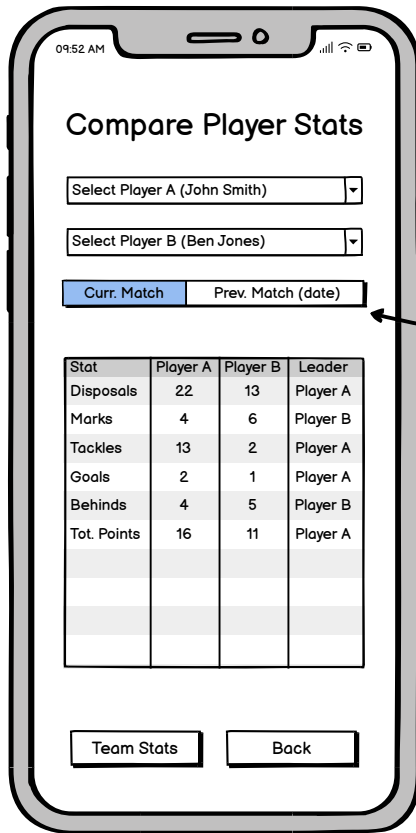

Buttons link to player or team specific stats for the current game. An icon for sharing the matches statistics (shares via a plain text file).

Choose which player's stats to view and whether to view them by current (ongoing) or a previous match.

Simple table displaying the metrics for the currently selected player.

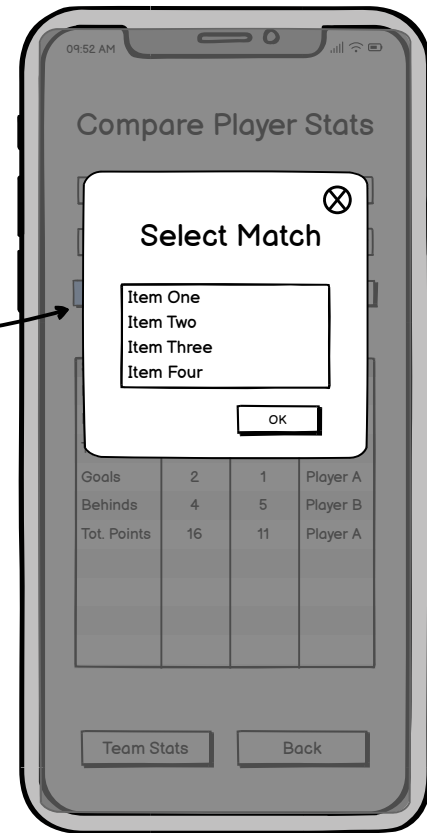

Currently selected player's image, with some text giving some background on the player. Either of these fields can be selected by the user to upload, edit, or replace the image or information.

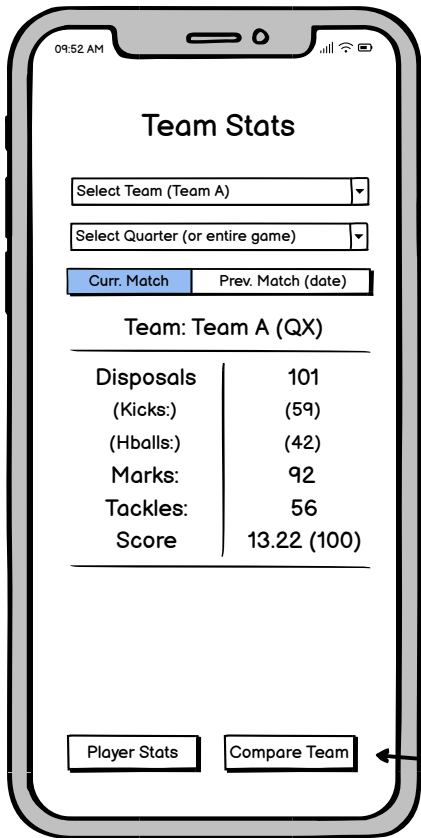

Choose which player's stats to compare and whether to view them by current (ongoing) or a previous match.

Simple table comparing the metrics for the currently selected players and highlighting who is the currently leader in specific metrics.

Link back to the single player stats or to team stats.

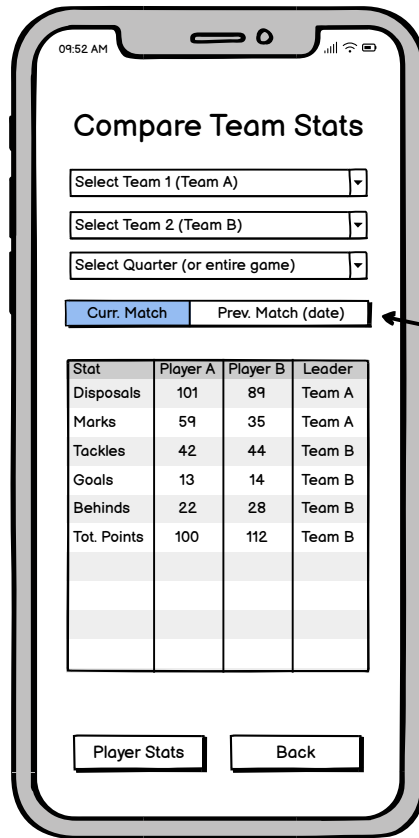

Selecting Prev. Match (date) on either the 'Compare Player Stats' or the 'Player Stats' windows will allow the user to select the match they want to view stats for. Selection of a match will update the (date) component with the relevant date for the selected match.

Choose which team's stats to view and whether to view them by current (ongoing) or previous match. This can be further filtered by a specific quarter, or the entire match.

Simple table displaying the metrics for the currently selected team.

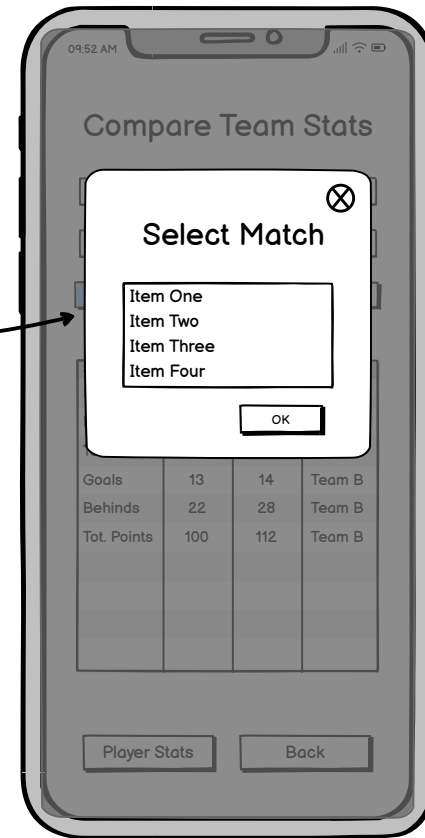

Free space to use for more metrics or a kind of 'team profile' (information about the team itself rather than just metrics).

Choose which team's stats to compare and whether to view them by current (ongoing) or previous match. This can be further filtered by a specific quarter, or the entire match.

Simple table comparing the metrics for the currently selected teams and highlighting which is the currently leader in specific metrics.

Link back to the single team stats or to Player stats.

Selecting Prev. Match (date) on either the 'Compare Team Stats' or the 'Team Stats' windows will allow the user to select the match they want to view stats for. Selection of a match will update the (date) component with the relevant date for the selected match.
